

# FERBLOCK BRODI 25

For general public, professional and trained professional users

## Characteristics:

FERBLOCK BRODI 25 is a biocide product PT14.

FERBLOCK BRODI 25 is a rodenticide bait formulation, containing an anticoagulant active ingredient, named Brodifacoum. The formulation consists of a very palatable wax block for the target animals. The product does not alert and does not generate suspicions to the other members of the rodent population. FERBLOCK BRODI 25 can be used indoor and around industrial buildings (including warehouses, depots, ship holds), rural, civil, homes, basements, garages, storerooms, gardens and outdoor areas of relevance.

## TARGET PESTS

HOUSE MOUSE

BROWN RAT

## USAGE ADDRESSES

INDUSTRY

PRIVATE

INTERNAL

EXTERNAL

### Composition:

100 grams of product contain:

Brodifacoum (CAS N° 56073-10-0) 0.0025 g

Denatonium Benzoate (CAS N° 3734-33-6) 0.001 g

Co-formulant to 100 g

### Formulation:

Block baits are among the safest baits to use, increasingly appreciated by pest control professionals and beyond. After countless tests in the laboratory and in the field, Ferbi has developed a lure in blocks with excellent characteristics:

Ultra-Low Paraffin - this allows it to withstand extremely high temperatures without softening;

Rich recipe - a blend of human food grade products resulting from extensive studies;

Natural fragrance - the particular production process limits production times and creates a product that preserves the natural aromas.

The bait contains Denatonium benzoate, a bitter substance, to prevent accidental ingestion by children.

### Usage rates:

Indoor, outdoor and around buildings.

Against House mouse (*Mus musculus*), dispose 20 - 40 g of bait every 10 - 15 m.

Against Brown rat (*Rattus norvegicus*), dispose 100 - 200 g of bait every 5 - 10 m.

Do not apply this product directly in the burrows.

### Hazard statements:

H373 May cause damage to organs (blood) through prolonged or repeated exposure.
